Projects:

GitHub: <https://github.com/sm-samax>

- Stripe payment
- Spring MVC webshop
- Pinterest remake
- Toxicity classifier

Languages:

- Hungarian
- English
- Serbian

Objective:

It is more than 5 years since I have become passionate about computer science. Initially I modified games and repaired malfunctioning computers. Afterwards, in the university I learnt a lot about OOP and design principles, along with quality assurance. In addition, I had the luck to work with professional software engineers, where I found myself achieving better in the backend. I like getting touch with people and help their way with my knowledge or take their advice.

Education:

2016-2020 – Highschool of Senta – General major

2020-present – Faculty of Sciences, Novi Sad – Department of Mathematics and Informatics – Information technology major

July 20, 2021 – Oracle University – Oracle Certified Professional: Java SE 11 Developer
