Skills:

- Java
- SQL
- NoSQL
- JavaScript
- Python
- Linux
- Docker
- ChatGPT

Experience:

2019-present – **Freelancing** – Computer service

2022 – **Work practice** – JUSOFT Hungary Ltd. – Java Backend developer

2023-present – **Full-time** – Faculty of Sciences, Novi Sad – Java Backend developer

Projects:

GitHub: <https://github.com/sm-samax>

- Payment integration (Spring)
- Webshop (Spring)
- Pinterest remake (Angular)
- ML - Toxicity classifier (Python)

Languages:

- Hungarian
- English
- Serbian

Objective:

It has been more than 5 years since I developed a passion for computer science. Initially, I focused on modifying games and repairing malfunctioning computers. During my university years, I gained extensive knowledge in OOP and SOLID principles, as well as expertise in quality assurance. Additionally, I had the opportunity to work in Agile environment, and I discovered that I excelled particularly in backend development. I have experience in developing both microservice-based and monolithic architectures. I enjoy engaging with people, offering assistance with my knowledge, and being receptive to their advice.

Education:

2016-2020 – **Highschool of Senta** – General major

2020-present – **Faculty of Sciences, Novi Sad** – Department of Mathematics and Informatics – Information technology major

July 20, 2021 – **Oracle University** – Oracle Certified Professional: Java SE 11 Developer
