Objective:

It is more than 5 years since I have become passionate about computer science. Initially I modified games and repaired malfunctioning computers. Afterwards, in the university I learnt a lot about OOP and design principles, along with quality assurance. In addition, I had the luck to work wih professional software engineers, where I found myself achieveing better in the backend. I like getting touch with people and help their way with my knowledge or take their advice.

Skills:

- Java (Spring Boot)
- SQL (PostgreSQL, MySQL)
- NoSQL(MongoDB, Neo4J)

- JavaScript (Angular, React)
- Python (Tensorflow)
- Version controlling (Git)

Projects:

- Stripe payment (link)
- Spring MVC webshop (link)

- Pinterest remake (link)
- Toxicity classifier (link)

Education:

2016-2020 – Highschool of Senta – General major

2020-present – Faculty of Sciences, Novi Sad – Department of Mathematics and Informatics – Information technology major

Certifications:

July 20, 2021 – Oracle University – Oracle Certified Professional: Java SE 11 Developer

Experience:

2019-present – Freelancing – Computer service (virus removal, OS repair etc.)

2022-present – JUSOFT Hungary Ltd. – Java backend developer

Languages:

- Hungarian

- English
- Serbian
